Revision	Description	Author	Date
01	First Release	MMc	6/5/18

Overview

In June of 2018 Cane Creek made a change to the DBAIR CS/ DBCOIL CS product line. We standardized the high speed / Low speed adjusters and high speed springs in all cylinder heads across the board for this product family to use the following.

CS Orifice, Compression:	0.0
HSC valve spring:	20N/mm
CS Orifice, Rebound:	0.8
HSR valve spring:	30N/mm
LS Compression:	1.8
LS Rebound:	1.8

This change will result in a larger adjustment range with very little effect on the all-open setting.

Scope

There is no effect on shocks in the field. This change standardizes all shocks moving forward.

Solution

No solution needed.
