Revision	Description	Author	Date
01	First Release	MMc	5/17/17

Overview

In May of 2017 Cane Creek made a change to rear shocks AIR-CS and COIL-CS. This change was made to standardize the mounting eyelets. The size of eyelets changed from 14.7mm to 15mm. AIR and COIL will still be made to 14.7mm until stock is depleted or they are obsoleted by the CS models.

In changing the eyelet size Cane Creek is using IGUS bushings which are easier to install, they do not need to be sized and are self-lubricating. IGUS bushings will be used in all 15mm Eyelet shocks.

Scope

Rear shocks AIR-IL, COIL-IL, INLINE and C-QUENT were originally released with 15mm eyelets and use IGUS bushings.

Solution

Cane creek will continue to sell bushings for 14.7 eyelets.
